

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (currently amended) An overflow system for a bathtub which has a bottom, and adjacent side and endwalls, a drain port in the bottom, and an overflow port in one of the endwalls, comprising:
a drain pipe adapted to be in communication with said drain port and said overflow port,
said drain pipe having an inverted L-shape, including a horizontal leg extending into and through the overflow port of the bathtub, and a vertical leg extending downwardly for connection to a fluid drain system,
threads on the horizontal leg extending through the overflow port, and
a cap threadably mounted on an end of the horizontal leg extending through the overflow port,
the cap having an opening in its circular planar end, with a thin flexible sealing membrane ~~secure~~secured to the cap and extending over the opening in the circular planar end.
2. (original) A plumbing test system comprising;
a pipe having a first exposed end and second end in communication with a fluid source, wherein the first end comprises a threaded portion;
a cap assembly threadably mounted on the first end and wherein a portion of the cap assembly is composed of a material capable of sealing the first end when the cap is threaded onto the first end;

Application No. 10/721,694
Docket No. P06474US3
Reply to Office Action of July 23, 2004

the cap assembly contains a cap having an opening in a planar end, with a sealing member secured to the cap and extending over the opening in the planar end.
